

Launch Respondus LockDown Student Instructions For Various Browsers

NOTE: Respondus LockDown browser should **NOT** be launched directly from the computer. Launch one of the browsers listed below and follow the instructions.

Chrome browser launching Respondus for a Moodle Quiz (recommended browser)

NOTE: Respondus can be used with the Chrome Browser that is installed on a PC or Macbook. This is not the same thing as a Chromebook. Students cannot use Chromebook devices because Respondus cannot be loaded on the device.

1. Make sure no other applications are running – **strongly recommend restarting computer** if possible.
2. Launch Chrome browser
3. Login to Moodle and enter course with the test.
4. Click on the quiz.
5. Quiz instructions provide a “Launch LockDown Browser” button (see image below). Click the button.

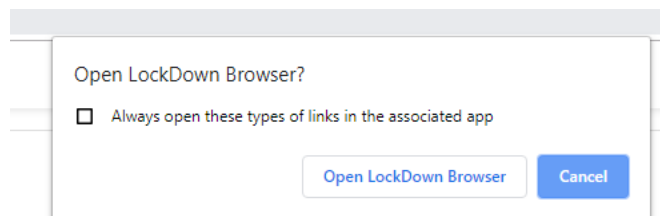

Respondus LockDown Browser is required for this exam.

Launch LockDown Browser

6. Open LockDown Browser? dialog box displays. Click the Open LockDown Browser button

NOTE: you can click the checkbox next to “Always open these types of links in the associated app” and this dialog box will not display in the future.

7. User Account Control window displays asking “Do you want to allow this app to make changes to your device” and you must select Yes button to launch the browser.
8. If any applications were running, Respondus will attempt to shut them down. The shutdown process may take several minutes to complete. This is the reason for the restart recommended in step 1 of this process.
9. The Respondus LockDown Browser page is displayed. Click the Start Quiz button to begin the quiz.

Firefox browser launching Respondus for a Moodle Quiz

1. Make sure no other applications are running – **strongly recommend restarting computer** if possible.
2. Launch Firefox browser
3. Login to Moodle and enter course with the test.
4. Click on the quiz.
